

Muhammad Hammad

COMPUTER SCIENCE STUDENT

Multan, Pakistan | hammadmazhar512@gmail.com | github.com/hammad61245 | linkedin.com/in/muhammadhammad | leetcode.com/hammad61245

PROFILE

I'm a Computer Science student at Air University Multan Campus with hands-on experience in full-stack web development, database design, and desktop application development. I've built projects ranging from SaaS platforms to booking systems, and I'm comfortable working across the stack. I pick up new tools quickly and like building things that actually work well and are useful to people.

EDUCATION

BS Computer Science
Air University Multan Campus

2022 — Present
CGPA: 3.2 / 4.0

FSC Pre-Medical
Multan Nishat College

2023
965 / 1000

Matriculation — Pre-Medical
Zakariya Public School

2021
1092 / 1100

SKILLS

Languages	C++, C#, JavaScript, Python , SQL
Frontend	HTML, CSS, React, Tailwind, Bootstrap
Backend	Node.js, Express
Database	MongoDB, SQL Server , SQLite
Tools	Git, GitHub, VS Code, Bash
FrameWorks	.NET , Django , Next.js , Flask

PROJECTS

Event Tickets SaaS App

Multi-tenant SaaS platform for event creation, ticket management, and attendee tracking. Includes user authentication, dashboard analytics, and ticket generation.

github.com/hammad61245/Event-Tickets-SaaS

React Node.js MongoDB SaaS

Auto Trading Bot | Python

Developed an automated gold trading bot for XAU/USD using Python and MetaTrader 5. Integrated machine learning models and technical indicators for trade prediction and execution. Implemented risk management features including stop-loss, take-profit, and trailing stop automation , using Meta-Trader API

Python LightBGM

Weather ForeCast Application

A simple web app that lets users search for a city and retrieve its current weather conditions — temperature, description, and weather icon — using the OpenWeatherMap API.

Python 3.13 Flask BootStrap
Open Weather Api

Full Stack Semester Project

Web application with a RESTful API backend, dynamic React frontend, and JWT-based authentication. Integrated a database layer and built a responsive UI throughout.

React Node.js Express MongoDB

Railway Reservation System

Desktop application for end-to-end train booking. Handles passenger management, schedule tracking, seat allocation, and user feedback.

C# SQL Server Desktop App

Portfolio Website

Personal portfolio site built with HTML, CSS, and C# to showcase projects and skills. Clean layout with responsive design and cross-device compatibility.

github.com/Hammadmazhar61245/Portfolio
HTML CSS C# JavaScript

MongoDB Database Project

Designed NoSQL collections and document schemas for scalable architecture. Defined inter-collection relationships and optimised for read-heavy workloads.

MongoDB NoSQL Schema Design

Static Portfolio Website

Responsive personal website showcasing academic and technical work. Built from scratch focusing on fast load times and clean structure across devices using the github hosting pages

HTML CSS Responsive
